Comment Text :

- 1 --I object to the movement of nuclear waste by rail and truck for the following reasons. I am a member of the School Board of Ursuline Academy in St. Louis Missouri. A school of 700 girls and faculty is located directly adjacent to a railroad line and any kind of accident would impact many lives and families. Additionally, I live on property adjacent to a railroad line along the Mississippi River and our property is home to a daycare for 50 children under the age of 5. Any accident on this rail line would not only impact those of us who live here, but pre-school children, not to mention the devastation to millions should any spill go into the Mississippi River and be carried downstream.
